NOW ENROLLING

BARRIE, ONTARIO

Finally feel like *yourself* again.

A 6-step clinical protocol for women in perimenopause and menopause — led by a dedicated Nurse Practitioner who will listen, test thoroughly, and build a plan that actually works.

- No family doctor required · OHIP-covered bloodwork · Founding rate: $695 + HST

beoptimal.ca · (437) 370-0291

THE CHALLENGE

Your body is changing, but you can still *feel optimal.*

Most family physicians have **10 minutes per visit** and received fewer than a handful of hours of menopause-specific training in medical school. It's not that they don't care — it's that the system wasn't built for this. We're here to fill that gap.

It doesn't have to be this way. The right assessment, with a clinician who specializes in hormone health, can change the trajectory of this entire chapter of your life.

WHY THE OPTIMAL PROTOCOL?

60-minute appointments · Same NP every visit · OHIP bloodwork · InBody scans · Structured 6-step protocol

SOUND FAMILIAR?

You don't need a diagnosis *to start*

Many women aren't sure if what they're experiencing is perimenopause, menopause, or thyroid — that's exactly what the assessment is for.

Brain fog & fatigue
Can't focus. Exhausted by 2pm no matter how much you slept.

Hot flashes & night sweats
Disrupting your day and destroying your sleep.

Mood changes & anxiety
Irritability or anxiety that came out of nowhere.

Sleep disruption
Falling asleep is fine. Staying asleep? That ended.

Weight & body changes
Your metabolism shifted. Nothing is working the way it used to.

Low libido & dryness
Changes you don't feel comfortable raising in 10 minutes.

YOUR BODY IS CHANGING

The biology *behind your symptoms*

Your hormones work in concert. When one or more shift — as they naturally do through perimenopause — the effects ripple across your whole wellbeing.

SYMPTOMS	HORMONAL DRIVER
Hot flashes night sweats	Estrogen ↓ Declining through perimenopause
Brain fog poor memory	Estrogen ↓ Impacts hippocampal function
Mood shifts anxiety	Progesterone ↓ Often the first hormone to drop
Sleep disruption	Progesterone ↓ Natural sedative effect lost
Low libido vaginal dryness	Testosterone ↓ Declines with age & stress
Weight changes slowed metabolism	Thyroid (T3/T4) Often missed on standard panels
Fatigue muscle loss	Cortisol ↑ Elevated by chronic stress

HOW IT WORKS

A 6-step *protocol.* Not a single appointment.

A structured clinical program with a dedicated care team — so nothing falls through the cracks.

01

STEP 01

Initial Phone Call

Care coordinator reviews your history and confirms you're a good candidate for the protocol.

02

STEP 02

Onboarding Visit

Protocol orientation, InBody body composition scan, and OHIP bloodwork requisition provided.

03

STEP 03

Bloodwork

Comprehensive hormone panel at LifeLabs or Dynacare — fully OHIP covered.

04

STEP 04

60-Min NP Consultation

Deep results review, personalized treatment plan, and prescriptions as appropriate.

05

STEP 05

Follow-Up #1

Symptom check, dose review, adjustments as needed. Virtual or in-person, 30 min.

06

STEP 06

Follow-Up #2

InBody repeat, treatment review, 1-year Rx renewal, and annual care plan established.

EVERYTHING INCLUDED

Your *Optimal* protocol

One fee. No surprise bills. Everything below is covered by your single protocol fee.

60-Min NP Consultation

A deep-dive assessment with your dedicated Nurse Practitioner. Not a rushed visit — a real conversation about your history, symptoms, and goals.

OHIP-Covered Bloodwork

A comprehensive hormone and metabolic panel — estradiol, testosterone, progesterone, FSH, thyroid, cortisol, DHEA — covered by your health card.

Body Composition Analysis × 2

InBody scan at intake and follow-up. Real data on muscle mass, metabolic rate, and body fat — not just a number on a scale.

Two NP Follow-Up Appointments

Review progress, adjust dosing, and manage side effects. Virtual or in-person options available for your convenience.

- ✓ Written treatment plan
- ✓ Dedicated care coordinator
- ✓ Secure patient portal
- ✓ GP coordination & reports

HOW WE COMPARE

Not all hormone care is *the same*

We built this protocol to fill the gaps left by alternatives available in Barrie and across Ontario.

	Optimal Hormone Protocol	Family Doctor / Walk-in	Med Spa / Pellet Clinic
Consultation length	✓ 60 minutes Thorough, unhurried	✗ 10 minutes Rushed visits	✓ 30–45 min
Same clinician every visit	✓ Yes Your NP from start to finish	✗ Often no Rotating providers	✓ Usually
Comprehensive bloodwork	✓ Full panel OHIP-covered	✓ Basic OHIP-covered	✗ Limited Often out-of-pocket
Body composition testing	✓ InBody × 2 Baseline + follow-up	✗ No	✗ Rarely
Structured follow-up	✓ 2 NP visits 6-step protocol	✗ If you rebook	✓ Insertion visits Every 3–6 months
Treatment options	✓ Wider HRT range More options available	✓ Standard HRT	✗ Pellets only Not Health Canada-approved
Year-one cost	✓ $695 All-in, introductory rate	✓ $0 OHIP If you can get an appointment	✗ $1,800–$2,200+ Pellet insertions + consults

Introductory rate of $695 + HST. Standard rate will be $895 + HST.

POTENTIAL BENEFITS

Real relief. *Real results.*

Women in hormone optimization protocols often report meaningful improvement within the first 8–12 weeks.

Sleep through the night

Night sweats and insomnia are among the first symptoms to improve with proper hormone support.

Think clearly again

Brain fog and mental fatigue often resolve once hormone levels are properly addressed.

Stable energy all day

No more crashing by mid-afternoon. Balanced hormones support sustained energy.

Mood you recognize

Anxiety and low mood often improve significantly when the hormonal picture is corrected.

Feel like yourself

Libido, comfort, and confidence — the things that slipped away — can come back.

Measurable progress

Body composition scans give you data — not just a feeling — that things are changing.

PRICING

Simple, *transparent* pricing

One protocol fee covers everything. No hidden costs. No surprise bills.

FOUNDING PATIENT RATE

60-min NP consultation + treatment plan	Included
Comprehensive hormone bloodwork panel	Included
InBody body composition scan × 2	Included
Onboarding & orientation appointment	Included

NP receipts may be submittable to extended health plans. May qualify as a medical expense on your taxes.

NP RECEIPTS

Many extended health benefit plans will accept receipts from Nurse Practitioners. Check with your insurer — this may be partially or fully reimbursable.

TAX DEDUCTIBLE

Protocol fees may qualify as a medical expense on your personal income tax return under CRA guidelines.

OHIP BLOODWORK

Your comprehensive hormone panel is ordered under OHIP and processed at LifeLabs or Dynacare — at zero additional cost to you.

YOUR CLINICIAN

Chantelle Oostwoud, MN PHC-NP

Chantelle Oostwoud

MN, PHC-NP · NURSE PRACTITIONER

Chantelle Oostwoud, MN, PHC-NP is the dedicated clinician for the Women's Hormone Health Protocol at Optimal Family Health. A Nurse Practitioner with a Master of Nursing from Athabasca University, she brings nearly a decade of frontline experience across emergency medicine, critical care, and remote community health to her work in Optimal's Enhanced Care program — where she works with a small panel of patients who want more time, more thoroughness, and more answers than the standard system typically allows.

Start your journey to *feeling like yourself* again.

A free intro call with our care coordinator takes fifteen minutes. No commitment. No pressure. Just a conversation about what you're going through and whether the protocol is right for you.
